EDUCATION

University of California, Berkeley

Expected June 2029

Data Science, BA — GPA: 3.925

Dean's List - College of Computing, Data Science, and Society

Relevant Coursework: CS189 Intro to Machine Learning, MATH54 Lin Alg and Diff Eq

Mira Loma High School

2021–2025

International Baccalaureate Diploma — Weighted GPA: 4.6

RESEARCH

Undergraduate Researcher

Dec 2025–Present

Under Professor Gopala Anumanchipalli | BAIR Speech Group

- Achieved state-of-the-art circle packing density through implementing online test time training algorithm DPO, engineering custom preference dataset construction pipelines and iterative fine-tuning loops
- Improved baseline accuracies of open source models on problem sets MATH and MBPP, through building GRPO and in-context frameworks and evaluating continual learning techniques
- Enhancing algorithm discovery architectures by extending current evolutionary framework AlphaEvolve with online reinforcement learning, enabling dynamic policy adaptation at test time

Research Assistant

Aug 2025–Dec 2025

Under Professor Park Sinchaisri | BOBALAB

- Explored pedagogical applications of LLMs through various NLP techniques, investigating how educators can use LLMs to design curriculum and coursework; findings published in [personal blog post](#)
- Increased delivery order acceptances by over 50% through analyzing millions of orders, using various regression models to identify factors affecting driver acceptance rates along with temporal patterns in driver behavior.

Research Assistant

Jan 2024–Nov 2025

Under Professor Gabriel Simmons | UC Davis

- Proposed and implemented unsupervised metrics to measure how ontological structures develop in LLM unembedding spaces
- Demonstrated that hierarchical knowledge representations strengthen with increased model size and training, with emergent correlations with term depth and pretraining frequency; findings published as lead author in [collaborative blog post](#)

PROJECTS

Co-Founder and CTO

2026–Present

Adefy

- Founded [adefy.ai](#), an AI advertising platform that seamlessly and automatically integrates brands into videos
- Built end-to-end AI agentic pipeline for product placement, and complete UI/UX design with front-end implementation of company website
- Raised over \$10k in angel investments, currently fundraising at the pre-seed stage

LEADERSHIP & COMMUNITY SERVICE

Founder — Sacramento Public Library Drop-in Coding Club

2024–Present

- Taught coding fundamentals and computational thinking to 50+ students across 10 local elementary and middle schools by establishing a weekly community program in partnership with Sacramento Public Library
- Awarded Youth Volunteer of the Year from DOVIA Sacramento for outstanding work

Founder & President — Mira Loma High School Computing Club

2022–2025

- Developed and taught a comprehensive computer science curriculum, ranging from Python basics to ML topics

TECHNICAL SKILLS

Programming & Tools

Python, Java, TypeScript, R, C/C++, SQL, Django, Git, Claude Code

AI/ML Frameworks

Model Context Protocol (MCP), HuggingFace, PyTorch, Scikit-learn, NLTK, Gudhi
